

Powder and Bulk Engineering

July 2010

Volume 24 Number 7

www.powderbulk.com

On the cover: Series CTR channel-frame conveyor is shown moving 150 lb/ft³ of iron ore concentrate from a truck receiving pit into an iron ore pellet processing facility. Conveyor's trough has three-roll idlers that carry the belt and material up a gradual incline and into the plant. Also shown is a catwalk and handrail on each side of the conveyor for easy access and maintenance. Courtesy of Rapat, Hawley, MN, 800-325-6377 (www.rapat.com).

INDUSTRY PERSPECTIVE

8 Handoffs and fumbles

Timothy A. Bell

MECHANICAL CONVEYING

25 Aeromechanical conveying: Simple, versatile, and efficient

Larry Blitz

30 Case history: Drag conveyor provides nuisance-free material transfer

36 Product summary

40 Resource catalogs

56 Suppliers' tips

Suppliers give pointers on selecting a mechanical conveyor that will handle highly abrasive materials.

GENERAL FEATURES

17 Pneumatic points to ponder...

Columnist Jack D. Hilbert explains how switching to pneumatic unloading can save energy and prevent maintenance headaches.

43 Ask the expert

Four bulk solids experts answer questions from readers.
