

Powder and Bulk Engineering

September 2017
Volume 31 Number 9
www.powderbulk.com

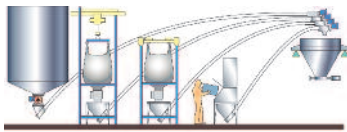

On the cover: Dry solids weighfeeders with a liquid feeder is shown during a customer demonstration for a bakery and confectionery manufacturer. System provides precise ingredient metering of unbleached flour, salt, wheat gluten, and a liquid flavoring for making breakfast bars. System includes a durable weighing system that's permanently calibrated and adjustment-free. System's high-resolution weight sensing is performed using the supplier's proprietary ratiometric digital weight resolver, which produces an unamplified, nonintegrated real-time weight signal for precise feedrate control.
