

On the cover: Model STJ-4717-10 TubeJet pulse-jet dust collector is shown filtering limestone dust from the fluid-bed dryer exhaust at an Ontario cement plant. Collector, which measures 32 feet by 11.5 feet, handles a 62,000-acfm airflow at 150°F. Collector features 16-ounce singed polyester bag filters with a 5.2-to-1 air-to-cloth ratio and two 44-inch-diameter hopper inlets, which distribute particle-laden gas through the dust collector.
