

# Powder and Bulk Engineering

May 2019 | Volume 33 Number 5  
www.powderbulk.com

## INDUSTRY PERSPECTIVE

**8** Time is running out  
*Jack Osborn*

## BAGGING AND PACKAGING

**24** Case history: Bulk bag fillers handle tons of copper

**28** Focus products

**55** Suppliers' tips  
Suppliers discuss how to evaluate the cost-effectiveness of packaging line automation.

## GENERAL FEATURES

**32** Show preview: PBE Solids Handling Conference

**38** Comparing MAIC with powder V-blending techniques for the addition of a silica flow aid  
*Katrina Brockbank, Charles Bowman, Tim Freeman, Willie Hendrickson*

**46** Show preview: Expo Pack Guadalajara

## COVER FEATURES

**18** Dust doctor: Getting it right the next time  
*John A. Constance*

**34** Match the proper magnet with a metal detector to avoid material contaminants  
*Eric Confer*

**On the cover:** Technipes Tecno GT/VL automated valve bag gravity packer with compact Transfer automated bag placer is shown packing abrasive grains at an Alabama facility. Packer is well-suited for most free-flowing grains, pellets, and prills, and bag weights from 20 to 110 pounds. Packer offers production speeds from 120 to 1,400 bags per hour with on-packer or downstream bag sealing options. Courtesy of Cordano Packaging Engineers, Cumming, GA, 678-947-0314 (www.cordanopackaging.com).

## DEPARTMENTS

**9** Industry news

**16** Markets update
