INDUSTRY PERSPECTIVE

7 Size reduction is an energy hog
John W. Carson

SIZE REDUCTION

27 Basic jet milling and cosmetic applications
Fred Surville

30 Focus products

34 In the spotlight: A S.H.O.T. at saving energy

48 Suppliers' tips
Suppliers discuss how to keep your size reduction equipment in top shape.

GENERAL FEATURES

15 Agglomeration Advisor: A glossary of agglomeration terms
William H. Engelleitner

COVER FEATURES

22 Identifying and mitigating unwanted particle breakage
Kerry Johanson

37 Air pollution control
A look at air pollution control equipment for your plant.

On the cover: Taurus ball mill for ultrafine particle size reduction is the newest addition to the supplier's Technical Facility in Exton, PA. Mill is suitable for processing various materials, including calcium carbonate, dolomite, talc, barite, coal, abrasive aluminum oxide, and others. Mill provides scalability and customization by coming in various sizes, ranging from lab-scale units to industrial-sized units with 2,000-kilowatt-sized motors.
